Small Step Towards Universe

Scripting a remarkable story of perseverance, India joined the elite space club with its successful **Chandrayaan-3** mission. India became the first country to land a spacecraft on the moon's south pole.

Chandrayaan-3 comprised three main components: a propulsion module, Vikram lander which helped in the soft landing on the moon and the Pragyaan rover which aided in taking measurements on the lunar surface. Not just **ISRO's** scientists, but households across the country carried the mission in their hearts, right from its launch on July 14, till touchdown on August 23 on Shiv Shakti Point.

By carrying non-fulfillment dream of Chandrayana-2, Chandrayana-3 took off along with hopes of new beginning of Indian space exploration. Effort & struggle behind success of Chandrayana-3 was tremendous, and whole journey behind success is a massive learning material. Team effort, Dedication, thought of never to give up, innovation and quality to learn from mistakes are the few of the qualities that we, **SCTPL** has implemented and strive to achieve in the company to advance towards our next goal.

One should understand what is our **National Pride**.

Once we realise, we will come to know our value system. The national pride is the one which teaches us **stand for the nation first** before you stand for your community, religion, family. Instead, when it starts from "me", then family, Pride, language, state comes before our nation. You have 5 steps to go.

When we think of nation first, our mind resets completely, then we don't have any differentiation of colour, language, religion, place... what comes is...

"Nation first"
